

Drone4HER: How?

- Increasing the capacity to apply digital technology to the traditional profession of gardeners working in historic gardens in Europe;
- Providing ad hoc digital material and online training courses to adult professionals working in historic gardens preservation and maintenance;
- Sharing the project results with the community of professional gardeners in Europe.

Drone4HER

What do we do?

Drone4HER is a Small-scale Partnerships project financed by the Italian National Agency Erasmus+.

The project addresses digital transformation in adult education through the development of digital readiness, resilience and capacity. The aim of the project is to provide innovative educational pathways, especially for overcoming skills mismatches in the digital sector using drone technology applied to the maintenance and preservation of historic gardens.

Drone4HER

What for?

Nowadays, the preservation and management of historic gardens are particularly complex due to the need for knowledge and low management investments, exacerbated by climate change and exotic diseases. To ensure the historic gardens' sustainability, it is essential to identify sustainable approaches combining new technology with traditional knowledge and the professional gardeners need to upgrade their skills and acquire digital competencies to stay competitive and adapt to changes in the market and be ready for new employment opportunities.
